JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Club Meetings

The regular meeting in June was held on the Second in the club room at the museum building. The meeting was addressed by Mr. D. E. Brown on the results of his recent visit to Westport, Grays Harbor County, Wn., where he went to study the migration of shore birds. He illustrated his talk by specimens secured on the trip. Mr. George G. Cantwell also gave a few remarks on observations made on a recent trip to Okanagon County, Wn.

---*---

A joint meeting of the Pacific Northwest Bird and Mammal Club and the Cooper Ornithological Club of California was held on the University of Washington campus on Wednesday evening, June 16th. This meeting was addressed by Dr. Barton W. Everman of the California Academy of Science, San Francisco, on "Museum Habitat Bird Groups"; by Tracy I. Storer of the Museum of Vertebrate Zoology, University of California, on the "Study of Individuality in Birds"; and by Mr. C. J. Albrecht of the State Museum, Seattle, with an illustrated talk on the "Mammals of Washington." This was a general meeting open to the public and was well attended and enjoyed by all. Previous to the meeting, the members joined in a dinner to their out of town guests at the University Commons, at which a number of short and snappy talks were given by several of the members and guests present.

---*---

The regular meeting of the Club held in the club room on July 7th, was one of the best meetings held since the club was organized, and a large number of the members were present. The main address of the evening was delivered by Dr. Walter P. Taylor, U. S. Biological Survey, on "The birds and mammals observed on a trip around Mt. Rainier by the biological party in the summer of 1919." His address was illustrated by a very fine series of lantern slides. Dr. E. W. Nelson, Chief of the U. S. Biological Survey, who was on his way to Alaska, was present, and gave a short address on the work of the Survey, in regard to the branding of waterfowl and to the conservation of the marsh breeding grounds for water birds. Professor Wm. T. Shaw of Pullman College gave a short talk on the bird and mammal life around Pullman, Wn., and extended an invitation to the members to visit him at Pullman. A number of out of town members were present at this meeting. At the close of the meeting, refreshments were served and an opportunity given the members to meet Dr. Nelson and Dr. Taylor informally.

---*---

The regular meetings during August and September were discontinued on account of so many of the members being out of town, either on field trips or on their vacations.

The officers expect that the opening fall meeting in October will find all members back and filled with pep and field experiences which will liven up the meetings during the coming winter.
